You need to recommend an application deployment method for App2 that meets the application requirements.

Which method should you recommend?

- A. A RemoteApp program
- B. Group Policy software installation
- C. A Client Hyper-V virtual machine
- D. A Microsoft Application Virtualization (App-V) package

**Answer: A**

App-V maintains local resources on the client whereas RemoteApp utilizes resources on the backend RDS Server.

The network data sent to the client is also different, App-V has two feature packs that contain all binaries of the streamed app. Remote Apps utilizes RDP, so only the picture information, mouse, keyboard etc are transmitted. Actually they can be combined, applications can be streamed to a RDS server and published to the client via RemoteApp. For more information, please see
