NEW QUESTION: 3

Scenario: Your organization has a Microsoft 365 tenant. You are configuring the tenant to send emails that contain malware to a separate mailbox for review. You need to configure the tenant to send emails that contain malware to a separate mailbox for review. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

A. Yes

B. No

Answer: B

Explanation:

Explanation

Azure virtual machine scale sets let you create and manage a group of load balanced VMs. The number of VM instances can automatically increase or decrease in response to demand or a defined schedule. Scale sets provide high availability to your applications, and allow you to centrally manage, configure, and update many VMs.

Virtual machines in a scale set can be deployed across multiple update domains and fault domains to maximize availability and

resilience to outages due to data center outages, and planned or unplanned maintenance events.
