NEW QUESTION: 2
A user is collecting 1000 records per second. The user wants to send the data to CloudWatch using a custom namespace. Which of the below mentioned options is recommended for this activity?
A. It is not possible to send all the data in one call. Thus, it should be sent one by one. CloudWatch will aggregate the data automatically
B. Create one csv file of all the data and send a single file

to CloudWatch
C. Send all the data values to CloudWatch in a single command by separating them with a comma.CloudWatch will parse automatically
D. Aggregate the data with statistics, such as Min, max, Average, Sum and Sample data and send the data to CloudWatch
Answer: D
Explanation:
Explanation
AWS CloudWatch supports the custom metrics. The user can always capture the custom data and upload the data to CloudWatch using CLI or APIs. The user can publish data to CloudWatch as single data points or as an aggregated set of data points called a statistic set using the command put-metric-data. It is recommended that when the user is having multiple data points per minute, he should aggregate the data so that it will minimize the number of calls to put-metric-data. In this case it will be single call to CloudWatch instead of 1000 calls if the data is aggregated.

NEW QUESTION: 3
Your customer is setting up serial control. The requirement is that if item A has serial 123, then they don't want item B to also have serial 123 within the same inventory organization. Which serial control setting must be used to meet this requirement?
A. Unique within organization
B. Unique across Enterprise
C. Unique within Item and organization
D. Unique across organizations
E. Unique within items
Answer: A
