NEW QUESTION: 1

Ein Unternehmen muss eine Reihe mobiler Anwendungen erstellen, damit seine Außendiensttechniker mehrere Aufgaben mit unterschiedlichem Komplexitätsgrad ausführen können. Ordnen Sie jede Option ihrer Antwort zu.

Anleitung: Um zu antworten, ziehen Sie den entsprechenden App-Typ aus der linken Spalte in die Definition rechts. Jeder App-Typ kann einmal, mehrmals oder gar nicht verwendet werden.

HINWEIS: Jede richtige Übereinstimmung ist einen Punkt wert.

Answer:

Explanation:

Explanation

Box 1: canvas

Both model-driven and canvas apps allow you to easily build business apps. They both share access to the Common Data Service providing standard and custom entities. Canvas apps

start with your user experience, crafting a highly tailored interface with the power of a blank canvas and connecting it to 200 data sources.

Canvas apps can be built for web, mobile, and tablet applications. Model-driven apps start with your data model - building up from the shape of your core business data and processes in the Common Data Service to model forms, views, and other components. Model-driven apps automatically generate great UI that is responsive across devices.

Box 2: model-driven

NEW QUESTION: 2

You create a custom entity named Project.

You want Top-Project instead of Project to appear in the UI for this entity.

Which two properties of the entity should you change? Each correct answer presents part of the solution. Choose two,

- A. Display Name
- B. Description
- C. Plural Name
- D. Name

Answer: A,C

Explanation:

Ref:<http://dynamicscrminfo.blogspot.co.uk/2013/06/how-to-create-customentity-in-crm-2011.html>

NEW QUESTION: 3

You have an Azure subscription that contains the resources shown in the following table.

The Not allowed resources types Azure policy is assigned to RG1 and uses the following parameters:

In RG1, you need to create a new virtual named VM2, and then connected VM2 to VNET1.

What should you do first?

- A. Remove Microsoft.Compute/virtualmachine from the policy
- B. Add a subnet to VNET1.
- C. Remove Microsoft.Network/virtualNetworks from the policy.
- D. Create an Azure resource Manager template.

Answer: C

NEW QUESTION: 4

An administrator notices that former temporary employees'

accounts are still active on a domain.

Which of the following can be implemented to increase security and prevent this from happening?

- A. Implement a password expiration policy.
- B. Implement an account expiration date for permanent employees.
- C. Implement time of day restrictions for all temporary employees.
- D. Run a last logon script to look for inactive accounts.

Answer: D

Explanation:

You can run a script to return a list of all accounts that haven't been used for a number of days, for example 30 days. If an account hasn't been logged into for 30 days, it's a safe bet that the user the account belonged to is no longer with the company. You can then disable all the accounts that the script returns. A disabled account cannot be used to log in to a system. This is a good security measure. As soon as an employee leaves the company, the employees account should always be disabled.
