C. Option B

D. Option D

Answer: B

NEW QUESTION: 2

On which interface can port security be configured?

A. destination port for SPAN

B. EtherChannel port group

C. static trunk ports

D. dynamic access point

Answer: C

Explanation:

Explanation/Reference:

Explanation:

Port Security and Port Types

You can configure port security only on Layer 2 interfaces.

Details about port security and different types of interfaces or ports are as follows:

Access ports--You can configure port security on interfaces that you have configured as Layer 2 access ports. On an access port, port security applies only to the access VLAN. Trunk ports--You can configure port security on interfaces that you have configured as Layer 2 trunk ports. VLAN maximums are not useful for access ports. The device allows VLAN maximums only for VLANs associated with the trunk port.

SPAN ports--You can configure port security on SPAN source ports but not on SPAN destination ports.

Ethernet Port Channels--Port security is not supported on Ethernet port channels. Reference: http://www.cisco.com/c/en/us/td/docs/switches/datacenter/sw/4_1/nx-os/security/configuration/guide/sec_nx-os-cfg/sec_portsec.html

NEW QUESTION: 3

When doing an AEM Online Backup, what should be configured to minimize the performance impact of the instance?

A. Configure the Delay option to zero so that the backup can be performed at full speed to finish sooner.

B. Set the TargetPath to a filename with the extension .zip to save time from additional compression.

C. Run Datastore Garbage Collection or Revision Cleanup concurrently to reduce the backup size.

D. Use a directory for the TargetPath so that the image of the entire repository can be created.

Answer: D

NEW QUESTION: 4

You know that AWS Billing and Cost Management integrates with the AWS Identity and Access Management (IAM) service so that you can control who in your organization has access to specific pages on the AWS Billing and Cost Management console.
