#### **NEW QUESTION: 1**

Using only commands included with named, what is the command, with options or parameters, to make named re-read its zone files?

#### **Answer:**

Explanation:  
rndc reload

#### **NEW QUESTION: 2**

An HP CloudSystem solution has been installed on the company data center to accommodate three (Dev, OA, Prod) departments computing requirements. Each department insists that they are the only owners who control and access their services, but the resource are shared using an IT as a service model with weekly

pricing for services. Each group has their own Designer account and designed users are placed in the IO\_users group. Some templates are shared all three departments.

The Dev department has decided to contribute six additional DL380 servers to the environment to be used as hypervisor hosts with the requirement that only they can have access to those servers.

The Prod department has encountered situations where their services are placed on low performance disk drives and has asked that the situations be fixed to use high performance drives.

The QA department utilization of the cloud is sporadic. When they use it, the QA department guidelines heavy loads during the entire week-long testing cycle.

Refer to the scenario.

Management has asked for a strategy moving forward that can address the disk performance issues that the Prod department is having. Which strategy can be implemented to give Prod the opportunity to ensure performance for their services, while encouraging other departments to evaluate their own requirements before ordering services?

- A. Add a Prod tag to all the high performance disks
- B. Alter which disk type each template is utilizing
- C. Change the pricing scheme for disk space to include service tiers
- D. Remove other department tags from high performance

**Answer: B**
