- A. The elements are the description of the required work.
- B. Elements are part of a weak matrix.
- C. They are deliverables.
- D. They analyze the risk.

Answer: C

NEW QUESTION: 3

Which two features does PAN-OS software use to identify applications? (Choose two.)

- A. transaction characteristics
- B. application layer payload
- C. session number
- D. port number

Answer: A,D

Explanation:

Signatures are then applied to allowed traffic to identify the application based on unique application properties and related [transaction characteristics]. The signature also determines if the application is being used on its [default port or it is using a non-standard port.] If the traffic is allowed by policy, the traffic is then scanned for threats and further analyzed for identifying the application more granularly.
