**NEW QUESTION: 1**

Which of the following is a benefit of using a feature isolation strategy?

- A. feature isolation
- B. main only
- C. development isolation
- D. release isolation

**Answer: C**

Explanation:

Explanation

Scenario: A branching strategy that supports developing new functionality in isolation must be used.

Feature isolation is a special derivation of the development isolation, allowing you to branch one or more feature branches from main, as shown, or from your dev branches.

When you need to work on a particular feature, it might be a good idea to create a feature branch.

Topic 2, Case Study: 20Overview

Existing Environment

This is a case study Case studies are not limed separately. You can use as much exam time at you would like to complete each case. However there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided m the case study Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of the case study, a review screen will appear. This screen allows you to review your answers and to mate changes before you move to the next section of the exam, After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment and problem statements. If the case study has an All Information tab, note that the information displayed on identical to the Information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Requirements

Contoso plans to improve its IT development and operations processes implementing Azue DevOps principles.

Contoso has an Azure subscription and creates an Azure DevOPs organization.

The Azure DevOps organization includes:

- \* The Docker extension

- \* A deployment pool named Pool7 that contains 10 Azure virtual machines that run Windows Server

2016.

The Azure subscription contains an Azure Automation account.

Planned Changes

Contoso plans to create projects in Azure DevOps as shown in the following table.

## Technical Requirements

Contoso identifies the following technical requirements:

- \* Implement build agents for Project 1.
- \* Whenever possible, use Azure resources
- \* Avoid using deprecated technologies
- \* Implement a code flow strategy for Project2 that will:
  - \* Enable Team 2 to submit pull requests for Project2.
  - \* Enable Team 2 to work independently on changes to a copy of Project2?
  - \* Ensure that any intermediary changes performed by Team2 on a copy of Project2 will be subject to the same restrictions as the ones defined in the build policy of Project2.
  - \* Whenever possible, implement automation and minimize administrative effort.
- \* Implement Protect3, Project5, Project6, and Project7 based on the planned changes.
- \* Implement Project4 and configure the project to push Docker images to Azure Container Registry.

### NEW QUESTION: 2
