Updated E_S4CPE_2021 Dumps With Valid QUESTIONS ANSWERS, Therefore, it is difficult for them to bring the students into a real test state, We provide 100% guaranteed success for E_S4CPE_2021 exams.

We are working on assisting aspiring young men to pursue **Exam E_S4CPE_2021 Bible** their career in this field many years, We wish you best of luck in your Everbrasil Certification pursuit.

Drag and Drop questions as experienced, If our E_S4CPE_2021 study material is updated, you will receive an E-mail with a new link, We helped more than thousands of candidates to own this E_S4CPE_2021 certification.

Besides, our technicians will check the website constantly to ensure you have a good online shopping environment while buying E_S4CPE_2021 exam dumps from us, We believe that the greatest value of E_S4CPE_2021 training guide lies in whether it can help candidates pass the examination, other problems are secondary.

NEW QUESTION: 1

Siehe Ausstellung.

Welche Aktion führen die Switches auf der Trunk-Verbindung aus?

A. Der Trunk wird nicht gebildet, aber VLAN 99 und VLAN 999 dürfen die Verbindung durchlaufen.

B. Der Trunk wird nicht gebildet und die Ports werden in den Status "Fehler deaktiviert" versetzt.

C. Die Trunk-Formulare, aber die nicht übereinstimmenden nativen VLANs werden in einer einzelnen Broadcast-Domäne zusammengeführt.

D. Die Trunk-Formulare, aber VLAN 99 und VLAN 999 sind heruntergefahren.

Answer: C

Explanation:

The trunk still forms with mismatched native VLANs and the traffic can actually flow between mismatched switches. But it is absolutely necessary that the native VLANs on both ends of a trunk link match; otherwise a native VLAN mismatch occurs, causing the two VLANs to effectively merge.

For example with the above configuration, SW1 would send untagged frames for VLAN 999. SW2 receives them but would think they are for VLAN 99 so we can say these two VLANs are merged.

NEW QUESTION: 2

Your network contains two Active Directory forests named adatum.com and contoso.com. The network contains three servers. The servers are configured as shown in the following table.

You need to ensure that connection requests from adatum.com users are forwarded to

Server2 and connection requests from contoso.com users are forwarded to Server3.

Which two should you configure in the connection request policies on Admin1? (Each correct answer presents part of the solution. Choose two.)

- A.** The Identity Type condition
- B.** The Authentication settings
- C.** The User Name condition
- D.** The Location Groups condition
- E.** The Standard RADIUS Attributes settings

Answer: B,C

Explanation:

C. The User Name attribute group contains the User Name attribute. By using this attribute, you can designate the user name, or a portion of the user name, that must match the user name supplied by the access client in the RADIUS message. This attribute is a character string that typically contains a realm name and a user account name. You can use pattern-matching syntax to specify user names.

E. By using this setting, you can override the authentication settings that are configured in all network policies and you can designate the authentication methods and types that are required to connect to your network. Forward requests to the following remote RADIUS server group. By using this setting, NPS forwards connection requests to the remote RADIUS server group that you specify. If the NPS server receives a valid Access-Accept message that corresponds to the Access-Request message, the connection attempt is considered authenticated and

authorized. In this case, the NPS server acts as a RADIUS proxy. <http://technet.microsoft.com/en-us/library/cc753603.aspx>

NEW QUESTION: 3

Match the network device with the correct User-ID technology.

Answer:

Explanation:

Explanation

Microsoft Exchange - Server monitoring
Linux authentication - syslog monitoring
Windows Client - client probing
Citrix client - Terminal Services agent
