- A. From System Properties, configure the System Protection settings.
- B. From Disk Management, convert the new disk to a dynamic disk.
- C. From System and Security, enable BitLocker Drive Encryption (BitLocker).
- D. From the properties of the new drive, create a share and modify the caching settings.

Answer: A

Explanation:

System protection might not be turned on for the drive. If system protection is not turned on, Windows can't create previous versions. To turn on system protection:

1. Click to open System.
2. In the left pane, click System protection. If you're prompted for an administrator password or confirmation, type the password or provide confirmation.
3. Click the drive, and then click Configure.
4. Click Restore system settings and previous versions of files, and then click OK.
