**NEW QUESTION: 4**

Which of the following is NOT an administrative control?

- A. Development of policies, standards, procedures and guidelines
- B. Screening of personnel
- C. Change control procedures
- D. Logical access control mechanisms

**Answer: D**

Explanation:

It is considered to be a technical control.

Logical is synonymous with Technical Control. That was the easy answer.

There are three broad categories of access control:

Administrative, Technical, and Physical.

Each category has different access control mechanisms that can be carried out manually or automatically. All of these access control mechanisms should work in concert with each other to protect an infrastructure and its data.

Each category of access control has several components that fall within it, as shown here:

Administrative Controls

Policy and procedures

Personnel controls

Supervisory structure  
Security-awareness training  
Testing  
Physical Controls  
Network segregation Perimeter security Computer controls Work  
area separation Data backups  
Technical Controls  
System access Network architecture Network access Encryption  
and protocols Control zone Auditing  
The following answers are incorrect :  
Screening of personnel is considered to be an administrative  
control  
Development of policies, standards, procedures and guidelines  
is considered to be an administrative control  
Change control procedures is considered to be an administrative  
control. Reference : Shon Harris AIO v3 , Chapter - 3 :
