NEW QUESTION: 1

A FileMaker 13 solution has a Customer table and a related Contact table. The relationship from Customer to Contact is configured to create related records in the Contact table. On the Relationships Graph, an external table occurrence called Invoice is referenced and is related to the Customer table. The solution has layouts based on the Customer, Contact, and Invoice table occurrences. The following script is used:

Script A:

New Record/Request

A button that performs Script A has been placed on the Customer layout in a portal that displays the related Contact records. Which two statements are true about this situation? (Choose two.)

A. Without a Go to Layout script step, Script A cannot be run from the Scripts menu and create a new record in the Invoice table.

B. When the button is clicked, a new record is created in the

Customer table.

C. If the user is on the Contact layout and runs Script A from the Scripts menu, a new record will be created in the Contact table.

D. If the user is on the Customer layout and runs Script A from the Scripts menu, a new record is created in the Customer table, and a new related record is created in the Contact table.

E. When the button is clicked, a new record is created in the Contact table.

Answer: B,C
