DRAG DROP

A company has a SharePoint 2013 farm in an Active Directory Domain Services (AD DS) domain. The company uses a third-party application to process payroll data and view payroll reports. The third-party application uses SQL Authentication. Payroll administrators currently use custom credentials to sign in to the payroll application.

You have the following requirements:

Payroll administrators must use Microsoft Excel and Excel Services to access payroll data and view

reports from within SharePoint.

Payroll administrators must not be required to enter credentials when accessing payroll data.

The Secure Store must be configured for high security and high process isolation.

You need to configure the Secure Store to meet the requirements.

Which four actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.) Select and Place:

Answer:

Explanation:

Explanation/Reference:

Note:

* To configure Secure Store, you perform the following steps: (step 1)

Register a managed account in SharePoint Server 2013 to run the Secure Store application pool.

(step 2)

Start the Secure Store Service on an application server in the farm.

Create a Secure Store Service service application.

* (step 3)

Before using the Secure Store Service, you must generate an encryption key. The key is used to encrypt and decrypt the credentials that are stored in the Secure Store Service database.

* (Step 4)

Storing credentials in Secure Store is accomplished by using a Secure Storetarget application.
