NEW QUESTION: 1
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.
You have an Office 365 subscription. All user mailboxes have an archive mailbox.
A new compliance policy has the following requirements:
* All email messages that are more than one year old must be moved to the archive mailbox.
* All email messages that are more than two years old must be deleted.

You create two default policy tags and one retention policy.
You need to implement the compliance policy.
Solution: You run the Set-Mailbox cmdlet and specify the
-RetentionUrl parameter.
Does this meet the goal?
A. Yes
B. No
Answer: B
Explanation:
Explanation
The Set-Mailbox RetentionUrl parameter specifies the URL or an
external web page with additional details about the
organization's messaging retention policies.
This URL can be used to expose details regarding retention
policies in general, which is usually a customized legal or IT
website for the company.

Refer to the exhibit.

Drag and drop the objects on the left to their correct
descriptions on the right

Answer:
Explanation:

A goes to C
B goes to A
C goes to B
Layer 4 to Layer 7 service policies contain the following:
* Services-Contains metadata (or all the functions provided by
a device such as SSL offloading and load- balancing. This MO
contains the connector names, encapsulation type, such as VLAN
and VXLAN, and any interface labels.
* Device Script-Represents a device script handler that
contains meta information about the related attributes of the
script handler including its name, package name, and version.
* Function Profile Group Container-Objects that contain the
functions available to the service device type. Function
profiles contain all the configurable parameters supported by
the device organized into folders.
