year after the purchase date.

NEW QUESTION: 1

An engineer must create a backup file of the entire Cisco UCS system before the maintenance window starts. The backup file must include these attributes:

- * all logical configuration settings such as service profiles, VLANs, and VSANs
- * all Cisco UCS usernames, roles, and locales
- * all Cisco UCS system settings

Which backup type must be selected to achieve this goal?

- A. Full State
- B. Logical Configuration
- C. System Configuration
- D. All Configuration

Answer: A

NEW QUESTION: 2

Answer:

Explanation:

Explanation

NEW QUESTION: 3

Your network contains a System Center 2012 Configuration Manager environment.

The environment contains a single primary site.

The primary site has a distribution point and a management point.

You need to recommend a communication solution that meets the following requirements:

- * Communication between the client computers in the research department and the management point must use HTTPS.
- * Communication between all of the other client computers and the management point must be able to use HTTP.
- * Minimize the number of site systems.

What should you do?

- A. Configure the existing management point to use HTTPS. Configure the research department computers always to use HTTPS.
- B. Create a new primary child site and configure the site to use native mode. Assign all of the research department computers to the new site.
- C. Install a new management point and configure Windows

Firewall to block about TCP port 80. Configure the research department computers always to use HTTPS.

D. Install a new management point and configure the management point always to use HTTPS. Configure the research department computers always to use HTTPS.

Answer: D

NEW QUESTION: 4

Annie has just succeeded in stealing a secure cookie via a XSS attack. She is able to replay the cookie even while the session is invalid on the server. Why do you think this is possible?

A. The scenario is invalid as a secure cookie cannot be replayed

B. It works because encryption is performed at the application layer (single encryption key)

C. Any cookie can be replayed irrespective of the session status

D. It works because encryption is performed at the network layer (layer 1 encryption)

Answer: B
